Full-Stack Developer · AI SaaS Products · React / Next.js / Node.js / Docker

SUMMARY

Full-stack developer with 2+ years of professional experience building and shipping production-grade web and mobile applications. Experienced in developing AI-powered SaaS products used by real, active users — contributing across the entire stack from scalable Node.js backends and database design to polished Next.js frontends. Comfortable with Docker-based deployments and fast, feedback-driven iteration cycles. Recognised at the BDApps Innovation Summit for entrepreneurial and technical merit.

TECHNICAL SKILLS

Frontend:	React, Next.js, React Native, TypeScript, JavaScript, Tailwind CSS	Backend:	Node.js, Express, REST APIs, MongoDB, Mongoose, Supabase, Firebase
DevOps & Tools:	Docker, Git, GitHub, VS Code, Postman	AI Tools:	Claude Code, OpenAI Codex, Cursor, GitHub Copilot
Integrations:	Sanity CMS, Stripe, Manual Payment Gateways		

PROFESSIONAL EXPERIENCE

SoftStandard Solutions Limited

Sept 2025 – Present · Remote

Full Stack Developer

Oppora.ai — AI Sales Automation Platform (live users)

- Developed and maintained frontend features using Next.js and TypeScript for a live B2B sales automation SaaS product with an active user base.
- Collected real user feedback, triaged bug reports, and shipped timely fixes to keep the platform stable and reliable in production.
- Integrated third-party AI services and external APIs to power core automation workflows; managed Docker-based deployments.

xBolt.ai — AI Calling & Communication Tool (live users)

- Contributed full-stack: built responsive frontend interfaces in Next.js/TypeScript and developed backend API endpoints with Node.js and Express.
- Implemented core calling and communication features end-to-end, owning both client-side UI interactions and server-side processing logic.
- Acted on real user feedback to resolve issues and iteratively improve call quality and UX; leveraged Claude Code, Cursor, and Codex to ship faster.

Beyond Softwares

Jan 2024 – Aug 2025 · Khulna, Bangladesh

Full Stack Developer

VocabSaas — Vocabulary Learning Web App (Next.js, TypeScript, Supabase, MongoDB)

- Delivered a full-featured learning platform with a flashcard system, bookmarks, and an admin dashboard for managing users, vocabulary items, and payments.
- Implemented a manual payment system and integrated Supabase with MongoDB for flexible and scalable data management.

VoiceForVoiceless — News Portal (Next.js, TypeScript, Sanity CMS, Tailwind CSS)

- Built a dynamic news portal with blog and stories sections, integrating Sanity CMS for efficient content management and publishing workflows.
- Designed a high-engagement frontend UI that improved user retention and effectively surfaced important stories.

PERSONAL PROJECTS

Modoutfi.com — Custom Garments E-Commerce Platform

modoutfi.com

Next.js · TypeScript · MongoDB · Mongoose · Tailwind CSS · Docker

- Engineered a full-stack e-commerce platform allowing users to customise garment designs with real-time preview functionality and a streamlined ordering workflow from design to checkout.
- Built a comprehensive admin dashboard covering order tracking, status management, and fulfilment features to optimise daily business operations.
- Deployed and maintained the application using Docker, ensuring environment parity between development and production.

ACHIEVEMENT

BDApps Innovation Summit — Participant & Recognised Innovator

National Technology Innovation Platform · Teletalk & BASIS, Bangladesh

- Selected to present an original technology product at the BDApps Innovation Summit — a prestigious national platform by Teletalk and BASIS recognising outstanding innovation and entrepreneurship in Bangladesh.
- Demonstrated the ability to translate ideas into functional, working software and communicate technical concepts effectively to a national audience of industry leaders and investors.

EDUCATION

B.Sc. Mechanical Engineering (Final Year) · Rajshahi University of Engineering & Technology (RUET), Bangladesh
